DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 22-27, 41, 42, 46-48, and 50-52, drawn to a coating comprising, classified in class 106, subclass 162.71.
 - II. Claims 28-32, 43, and 44, drawn to a coating consisting essentially of, classified in class 106, subclass 208.1.
 - III. Claims 33-37, 45, and 49, drawn to a coating, classified in class 106, subclass 208.1.

Claims 38-40 link(s) inventions Group I and Group III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 38-40. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are

no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as a coating composition. The Group II coating composition does not use the required modified cellulose of the Group I coating composition.

Invention Group I and Group III are related as a coating composition. The Group III coating composition does not use the required plasticizer of the Group I coating composition.

Inventions Group II and Group III are related as a coating composition. The Group III coating composition does not use the required plasticizer of the Group II coating composition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
